REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed subject matter in claims 1 and 2 are allowable because the arts of record fail to teach or fairly suggest the claimed "a wide bandwidth phase-lock loop circuit, comprising: a frequency detector arranged to measure an input signal of unknown frequency to detect frequency information of the input signal, the input signal being variable in frequency over a plurality of predetermined frequency ranges; a frequency range selector connected to the frequency detector; a phase-locked loop connected to the frequency range selector and capable of phase-locking with the input signal when configured to do so for each of the plurality of predetermined frequency ranges, wherein the frequency range selector automatically determines the frequency range for the input signal and configures the phase-locked loop to generate an output signal within one of the plurality of predetermined frequency ranges based on the frequency information of the input signal. said wide bandwidth phase-lock loop circuit being operable for phase-locking to ***said input signal without use of a sweep generator circuit to produce a sawtooth signal for sweeping a voltage controlled oscillator through a frequency band around an estimated frequency of said input signal*** as in claim 1."

As to reasons for allowance to claims 3-23, see prosecution history.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent numbers 4,513,256 and 6,175,259 issued to Kurihara et al. and Mann et al. disclose a PLL for locking the frequency having a sweep generator and selector for selecting frequency range according the sweep generator.
